Personal Statement

Third-year CSE undergraduate (CGPA 9.10/10) building applied **machine learning** and **GenAI systems** whose outputs can be **trusted and acted on**: calibrated risk models validated on **temporal splits,** and **retrieval-augmented assistants** that cite their sources and refuse when evidence is missing. Comfortable owning the full path from raw data and **evaluation design** to a tested, shipped product. Seeking **AI/ML and Data Science** internships where model output drives real decisions.

Projects

ClauseCheck – Procurement RAG Assistant *Sep-Oct 2026*
Python, ChromaDB, BM25, Sentence-Transformers, Groq, Gemini, SQLite, FastAPI, Streamlit

- Co-built (team of 2) a RAG assistant that answers supplier-contract questions with **clause-level citations** over **158 documents, 69 suppliers and 8K clause chunks,** owning ingestion, retrieval and the v1–v3 releases.
- Engineered **clause-aware chunking** and **hybrid retrieval** fusing vector search and BM25 via Reciprocal Rank Fusion, with cross-encoder re-ranking and amendment expansion, achieving **93.5% recall@5** (gold clause in top 5 for 29 of 31 questions).
- Led **end-to-end integration,** resolving **37 cross-module defects,** then added deterministic citation and figure verification, reaching **100% correct refusals, 3.2% false refusals, 1–5 s** answers and **375 passing tests.**

ChargebackLens – Transaction Dispute Risk & Decision Engine *Aug-Sep 2026*
Python, NumPy, Pandas, Plotly, Scikit-learn, Streamlit

- Built a calibrated dispute-risk scorer over **120K+** transactions, achieved **9.7×** the base rate in PR-AUC (**16.2× lift at top 1%**) and **43.2% recall** at 5% of volume reviewed.
- Engineered a leakage-safe, time-gated feature pipeline with a temporal split, benchmarked four scorers, and deployed calibrated Logistic Regression at **0.00185 calibration error**.
- Turned scores into a three-band allow / step-up / review policy with jointly optimised thresholds, yielding **₹11.99L net savings (39.1% of exposure)**, shipped as a Streamlit app.

DeliverIQ - Delivery Route Optimiser *Apr-May 2026*
Python, NumPy, Pandas, Plotly, Scikit-learn, Streamlit

- Architected an end-to-end ML delivery ETA prediction system using multi-source traffic, weather, and road-network datasets, processing **250K+ delivery trips** through scalable data pipeline.
- Engineered production-ready data processing by resolving missing values, invalid foreign keys, outliers, and inconsistent timestamps, then optimised a Random Forest regression model using Scikit-learn Pipelines and GridSearchCV, achieving **7.83 min MAE** and **55% improvement** over baseline.
- Developed and deployed an interactive Streamlit dashboard enabling real-time delivery forecasting, automated inference workflows, and visualisation of model metrics and feature importance.

Technical Skills

Languages: Python, Java
AI/ML: Machine Learning, Scikit-learn, Feature Engineering, Model Calibration, NLP, Azure AI
GenAI & LLMs: RAG, Embeddings, LLM Evaluation, Vector Search, Hybrid Retrieval (BM25, RRF), Cross-Encoder Re-ranking, Prompt Engineering
Data Analysis: NumPy, Pandas, Matplotlib, Seaborn, Plotly, MS Excel, Tableau, Streamlit
Databases: SQL, SQLite, ChromaDB
Power Platform: Copilot Studio, Power Apps, Power Automate, Dataverse, Power BI
Data Platforms: Databricks (Lakehouse Platform, Delta Lake, Unity Catalog)
Embedded & Robotics: Arduino, Raspberry Pi, ROS2, Gazebo, Sim2Real Deployment
Tools & Cloud: Git, GitHub, GitHub Actions, pytest, Docker, Azure, Vercel, Figma, Postman

Certifications

- Databricks Accredited: Databricks Fundamentals *Sep 2026*
- Microsoft Power Platform Functional Consultant Associate (PL-200) *Aug 2026*
- Microsoft Power Platform Fundamentals (PL-900) *Aug 2026*
- Anthropic Academy: AI Fluency *Mar 2026*
- Anthropic Academy: Claude 101 *Mar 2026*
- Microsoft Azure AI Fundamentals (AI-900) *Feb 2026*
- Microsoft GitHub Foundations (GH-900) *Feb 2026*

Forage Job Simulations

- **British Airways** – Data Science *May 2026*
  - Scraped and analysed customer review data to uncover drivers of customer sentiment.
  - Built a predictive model to identify the factors influencing customer buying behaviour.
- **BCG** – Data Science *Apr 2026*
  - Scoped a customer-churn investigation by identifying the client data needed and outlining the analysis approach; analysed and visualised churn trends in Python (Pandas, NumPy).
  - Engineered and tuned a random forest churn model to 50% recall, and delivered an executive summary of actionable findings to the team.
- **Commonwealth Bank** – Intro to Data Science *Apr 2026*
  - Built data-engineering pipelines to aggregate and extract insights from datasets, and anonymised personal data to meet data-privacy requirements.
  - Proposed analysis approaches for social-media data and designed a structured database schema for efficient information management.
- **JPMorgan Chase** – Quantitative Research *Apr 2026*
  - Analysed a loan book to build a model estimating each customer's probability of default.
  - Used dynamic programming to bucket FICO scores into optimal categorical ratings for default prediction.
- **Deloitte** – Data Analytics *Apr 2026*
  - Built a Tableau dashboard to support a forensic-technology investigation.
  - Classified data in Excel and drew business conclusions from the analysis.

Training

Resident Robotics Program *Jul 2026*
My Equation Education

- Built a foundation in robot kinematics, including mechanical structure, degrees of freedom, and Denavit-Hartenberg parameters, applying forward kinematics to multi-joint robotic arms.
- Gained exposure to actuation, control architecture, embedded platforms including Arduino and Raspberry Pi, and AI/ML applications in robotics including perception and decision-making.
- Worked with ROS2 middleware architecture and Gazebo simulation across a Sim2Real deployment pipeline for transferring robotic systems from simulation to physical hardware.

Education

B.Tech CSE (Software Product Engineering) *2024–2028*
Lovely Professional University, Punjab – **CGPA: 9.10/10**

Senior Secondary (XII), Science, CBSE *2022*
Kendriya Vidyalaya Chandkheda, Ahmedabad – **93%**

Secondary (X), CBSE *2020*
Kendriya Vidyalaya Chandkheda, Ahmedabad – **91%**

Relevant Courses with Outstanding and Excellent Grades

*Ongoing

Front-End Web Development	**Problem Solving Using Programming**	**Database Management Systems**
Back-End Web Development	**Data Structures & Algorithms**	**Operating Systems**
Full-Stack Development	**Object-Oriented Programming Lab**	**Design & Analysis of Algorithms***
Design for Developers	**Discrete Mathematics**	**DevOps Fundamentals***
